Notes

1. Pagination will signify users location in item listing & allow them to skip pages while browsing. For example: A user may choose to skip to page 4 when the title they are looking for starts with a "D"... to jump closer to their title
2. Items will automatically sort alphabetically by title
3. Patron has the option to sort by author too
4. "Search" button opens a modal window with 2 different search options
5. All items, checked in or checked out will appear automatically, so that users can see all items held by the BranchAnywhere
6. "Available Only" removes all items currently checked out from item view
7. Items checked out will appear with "Checked Out" text over the item
